

Smart Farming Using IoT

Team ID : PNT2022TMID31754

What do they **THINK & FEEL?**

Famer should be in the farm field to
monitor their crop field.
To save crop need to be smart.

What do they **HEAR?**

Farmer able to monitor and control
crop and inigation remotely.
To save crop need to be farmers.

What do they **SEE?**

Farmers not able to go out for emergency
purposes
they wasting time by monitoring the crops

What do they **SAY & DO?**

To create an technology to control
crop irrigation.
To natvigate easily

PAINS

It has false reports and less accuracy
Farmers are wasting their time by monitoring and irrigating crops

GAINS

lot based agricultural system help the farmer in monitoring different
parameter of a field like soil moisture, temperature, Humidity etc using
some sensors To natvigate easily
